

## Ahus - Checklist for quality and research projects

Doc. CEO: Subaitha Navaruban  
Approved by: Øystein Mæland

Valid from: 14.12.2022  
Revision deadline: 13.12.2024

ID: 41927  
Revision: 1.2

As a project manager, you will find an overview of points relevant to the start-up, implementation, and completion of quality and research projects. The document is set up as a checklist you can fill out. Information and guidance on the items in the checklist can be found [here](#).

**For clinical trials of medicinal products, it is recommended to supplement with checklists developed specifically for this type of study. The checklists are available on [NorCRIN.no](#).**

### Project information

Project title	
Manager	
P360 Case No.	

**NOTE! Project documentation (consent, protocols, etc.) must be archived on the applicable case in [P360](#).**

### Before start-up

The following must be assessed/executed before the start of the project:	Responsible	Done	Not Applicable
Read <a href="#">Responsibility in quality and research projects</a>			
<a href="#">Anchor the</a> project in your own department			
<a href="#">Literature search</a> /literature review			
Designing <a href="#">research protocol</a>			
Creation of a biobank:			
- Designing <a href="#">biobank protocols</a>			
- Creating <a href="#">a biobank budget</a>			
- Establish use of <a href="#">eBiobank</a> (electronic tracking solution)			
- Purchase of <a href="#">Services</a>			
Prepare <a href="#">consent and information letters</a>			
Clarify project staff			
Set up a total <a href="#">research budget</a>			
<a href="#">Apply for funding</a>			
Letter of award/ <a href="#">signing of contract</a>			
Creation of <a href="#">project number</a> (external funding)			
<a href="#">Collaboration agreements</a> with external parties (reviewed with a lawyer before signing)			
Internal cooperation and <a href="#">purchase of services</a>			
Prior approval from the <a href="#">Regional Committee for Medical and Health Research Ethics</a> (REK) – application and decision			
For clinical trials <a href="#">or trials of medical devices</a> : Pre-approval from <a href="#">the Norwegian Medicines Agency (SLV)</a> – application and decision			
Assess the need for <a href="#">exemption from the duty of confidentiality</a>			

Create a separate case for the project in <a href="#">Public360</a>			
Notification to the Data Protection Officer via <a href="#">eSkjema</a>			
- <a href="#">The head of department</a> has approved in eSkjema			
- Assess the need for <a href="#">a data protection impact</a> assessment (DPIA); the assessment is stored in <a href="#">P360</a> .			
If <a href="#">external parties are to process personal data</a> on behalf of the project: Enter into <a href="#">a Data Processing Agreement</a> . <a href="#">Assessing data management plan</a>			
Carry out risk assessment of <a href="#">information security</a> using digital tools:			
Create <a href="#">storage area</a> for project data			
Clarifying intellectual property rights ( <a href="#">innovation</a> )			
For clinical trials: publish the study on <a href="#">helsenorge.no/ahus.no</a> and <a href="#">clinicaltrials.gov</a>			

## On completion

The following shall be assessed/executed during implementation:	Responsible	Done	Not Applicable
Obtain informed <a href="#">consent</a> and <a href="#">document</a>			
Ensure <a href="#">secure storage</a> and handling of research data			
Safeguard secure storage and handling of biobank:			
- Update <a href="#">biobank protocol</a>			
- Update <a href="#">biobank budget</a>			
- Using <a href="#">eBiobank</a> (electronic tracking solution)			
- Purchase of <a href="#">Services</a>			
When disclosing <a href="#">biological material</a> and/or <a href="#">data</a> to external parties: enter into relevant agreements			
Revision of total <a href="#">research budget</a>			
In the event of changes to the consent form, protocol and/or DPIA, send a change notification to:			
- Data Protection Officer via <a href="#">eSkjema</a>			
- <a href="#">Regional Committee for Medical and Health Research Ethics</a> (REK)			
- <a href="#">Norwegian Medicines Agency</a> (SLV)			
<a href="#">Progress reporting</a> to funding sources			
<a href="#">Statistical</a> analyses of research data			
<a href="#">Publication</a> of results			
Register publications in <a href="#">Cristin</a>			

## Ending

The following should be assessed/executed at closing:	Responsible	Done	Not Applicable
<a href="#">Overspending/repayment</a> of funds			
Consider discontinuing or continuing a research biobank – application to the <a href="#">Regional Committee for Medical and Health Research Ethics</a> (REK)			

Send final report to:			
- Funding sources			
- <a href="#">Regional Committee for Medical and Health Research Ethics</a> (REK)			
- Data Protection Officer via <a href="#">eSkjema</a>			
<a href="#">Long-term storage</a> of research documents on paper after project completion (at Skytta)			
Delete link keys and declarations of consent			

For a more complete checklist for completion of projects, see the appendix to this EQS procedure.
