Project design and originality										
Feasibility										
Quality of the applicant (relative to career stage) and the research environment										

Impact (cross off)

	Bad		Satisfactory			Good		Very good		Excellent
	1	2	3	4	5	6	7	8	9	10
Needs justification										
Potential for implementation										
Importance of generating new knowledge and competence building										

External peers have to give a short (1/2 to 1 page) written assessment of the project.

Take these questions as a starting point:

- Should the project be supported or not? Why?
- What is missing in the application?
- Is the project feasible within the project period?
- Are user representatives involved in the project?
- Strength/weakness with the application?
- Will the project generate new knowledge?
- Advice for improving the application.

Write here the assessment of the project:
